

MOUNT CARMEL SCHOOL, CHANDIGARH

NOTICE

Date: 02-07-2024

Dear Parents / Guardian (Classes Pre-Nursery to XII),

Reg: Car-Pooling With Respect to “Zero Carbon- Meri Pehal” Initiative.

Car-sharing/pooling is a concept wherein a person can share a car journey with another. By having more people using one vehicle, car pooling emerges as a promising solution with numerous environmental benefits. It plays a vital role in reducing air pollution, cutting down green-house gas emissions, mitigating smog, reducing traffic jams and alleviating noise pollution. Road transportation is one of the biggest emitters of nitrogen oxides. A reduced amount of carbon emissions will help reduce air pollution as well.

In view of the paramount importance of achieving “Zero carbon Emission” and reducing traffic jams, we request you to kindly tie-up/co-ordinate with your neighbours and friends to encourage your wards for car pooling.

It will be a small step towards protecting our environment by reducing Carbon footprint.

Dr. Parveena John Singh
Principal
